DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Hsu (6,186,709).

Hsu discloses a hand-held tool comprising:

a housing 4 having a switching recess 40 formed therein; an actuation member 31 displaceably arranged in the switching recess for shifting a functional unit between different functional steps; and functional step display means having a read-out device (letter H & L - figure 2) provided in the housing for displaying an actual functional step and spaced from the switching recess (the member 31 divides the recess and creates the space between the recess and the functional step display).

Hsu further discloses: the display means is formed by the recess provided in the housing, and the recess are formed in an upper surface of the housing (as mentioned above, the recess 41 divided into two recesses by the member 31); slide member which forms a mechanical connection between the read-out device and the actuation member, the slide member being formed, together with the actuation member as a one-piece element (figure 2 shows the actuation member 31 is position inside the sliding member);

the read-out device comprises a plurality of arranged in a row, one after another, marks in a region of the display means, and wherein in each position of the slide member, at most, only one identifying mark is completely displayed by the display means (because there are only two marking H and L, therefore, the marking are actually arranged one after another, and when the sliding member are moving left or right only one marking will be seen at a time); the slide member has at least one locking member 21A engageable in respective matching locking means 41 provided on the housing at least in two positions of the slide member relative to the housing; and the actuation member is provided on the slide member (as in claim 6).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh K Truong whose telephone number is (703) 605-0423. The examiner can normally be reached on Mon-Thurs from 8:00 AM to 6:30 PM.
